Contents

This document comprises the following sections:
Scope ............................................................................................................... 2
Entry into force .......................................................................................... 2
Frequency of operation ............................................................................. 2
Proof of compliance ................................................................................... 2
Technical requirements ............................................................................. 3
Additional requirements ............................................................................ 4
Obtaining technical standards ................................................................. 4
Network information (only for network interfaces) .................................. 4
Document history ...................................................................................... 4

Scope
This document applies to Analogue PMR Handsets and Ancillary Equipment.
All telecommunications and radio terminal equipment must comply with the relevant technical
specifications established by CERT. In addition, such equipment may be subject to regulations for
Declaration of Conformity or registration. See http://www.cert.tn for details.
If more than one interface type is offered by a piece of equipment, each interface must meet the
applicable technical specifications.

Entry into force

This specification shall enter into force on 07/12/2015
**Frequency of operation**

Certain frequencies in the 136-174 MHz frequency band and in the 400 MHz frequency band may be made available for use by Analogue PMR equipment. Frequencies will be assigned on a case-by-case basis for PMR applications.

**Proof of compliance**

It is recommended that test reports are obtained from a laboratory that has been accredited by a body that is a member of the ILAC Mutual Recognition Arrangement.

**Technical requirements**

Testing should be carried out to ensure compliance with the following specifications as applicable:

**EN 300 086-2**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Land mobile Service; Radio equipment with an internal or external RF connector intended primarily for analogue speech. Part 2: Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive.

**EN 300 113-2**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Land mobile Service; Radio equipment intended for the transmission of data (and/or speech) using constant or non-constant envelope modulation and having an antenna connector; Part 2: Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive.

**EN 300 296-2**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Land Mobile Service; radio equipment using integral antennas intended primarily for analogue speech; Part 2: Harmonised EN covering essential requirements under Article 3.2 of the R&TTE Directive.

**EN 300 390-2**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Land Mobile Service; Radio Equipment intended for the transmission of data (and speech) and using an integral antenna. Part 2: Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive.

**EN 300 471-2**
Electromagnetic compatibility and Radio spectrum Matters (ERM); Land Mobile Service; Access protocol, occupation rules and corresponding technical characteristics of radio equipment for the transmission of data on shared channels. Part 2: Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive.
EN 301 489-1
Electromagnetic compatibility and Radio spectrum Matters (ERM); Electromagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements.

EN 301 489-5
Electromagnetic compatibility and Radio spectrum Matters (ERM); Electromagnetic Compatibility (EMC) standard for radio equipment and services; Part 5: Specific conditions for Private land Mobile Radio (PMR) and ancillary equipment (speech and non-speech).
FCC, CFR Title 47, Part 90, Private Land Mobile Radio Services (specific to US originated equipment only).

ANSI/TIA/EIA 603 (specific to US originated equipment only) Land mobile FM or PM communication equipment, measurement and performance standard.

MPT 1327
If no issue or revision number is quoted along with the title of a technical specification, the latest published version should be used.

General
In addition to meeting the above requirements, all equipment must comply with the requirement of CERT specification GEN001, be safe and must not adversely affect other electrical equipment.

Additional requirements
No additional requirements exist for Analogue PMR handsets and ancillary equipment at this time.

Obtaining technical
ETSI and NT technical standards, FCC rules and MPT 1327 may be obtained free of charge for individual use from the ETSI website www.etsi.org and for cost from the INORPI website www.innorpi.tn.

Network information (only for network interfaces)
Further information on the characteristics and presentation of network interfaces can be found by visiting operator's website.
